## About Me

With experience of more than 1 year working as Full-Stack Developer, and learining technologies like React JS and Node JS and using in various projects and doing DevOps like deploying them in server side and maintaining them like trouble shooting. And also working in Ecommerce using Wordpress and Magento.

## Projects

- Terolo
  **Front-End**

  Terolo is a business portfolio manager and performance monitor, developed for people who do diversified businesses. I worked in React JS and Api integration using REDUX.

- Thinroot Career Portal
  **Front-End and Back-End**

  Project Management is a web application that helps the Admin/Employees to manage projects, Employee leaves, Expenses and to maintain other employee data. And I am working on backend Node JS with CRUD Api ,sequalize and mail notifications

- Goal.ly
  **Front-End - Magento**

  Goal.ly is all in one productivity tool build for teams of all types across any industry. plan, track, and collaborate on any project, build the perfect workflow for you and your team, manage development sprints, and more all in one platform. I worked on creating landing page using Magento and Subscription plan and Orders flow Stripe Payment gateway plugin.
